

Dual lanes. One readiness platform.

ChiefOS turns troubleshooting, Tier 1 support, and validation into a self-documenting training record — at the edge, on accreditable models. One air-gapped platform for Networks and Services, organized around TOPL: Training, Operations, Planning, and Learning. Same Chief, same knowledge base, two mission stacks. Works disconnected. Your unit's procedures. Human warrant retains authority.

ChiefOS Networks

255N · TRANSPORT LANE

Bring the network up. Keep it up.

Routers, switches, encryption — bringing the network up and keeping it up at the signal node. Ticket-bound troubleshooting, validation checklists, 5W outage reports, shift handoff.

GB10 · 5× THIN CLIENTS · 8-PORT SWITCH · NET+ · SEC+ · TRANSPORT DRILLS

ChiefOS Services

255A · SERVICES LANE

Transport green means nothing if users can't log in.

Identity, DNS/DHCP, file and web services, endpoint management, and Tier 1 help desk for S1–S4, the command group, and special staff.

GX10 · ≥10× ENDPOINTS · 24-PORT SWITCH · SERVER+ · LINUX+ · SEC+ · IDENTITY / VIRT LABS

TOPL · SAME PILLARS ON BOTH LANES

T Training

NTC, JRTC, VALEX, CPX, and unit validation exercises — prove readiness on the kit.

O Operations

Live issue coach, disconnected help-desk tickets, and a record that survives the shift.

P Planning

Mission authoring, manifest, readiness gates, and validation catalog before the window opens.

L Learning

Team Chief Academy on the air-gapped node — cert prep and drills from last rotation's tickets.

Runs at the edge

Fully air-gapped. No cloud, no reachback, no NIPR dependency. Survives EMCON and contested transport. Accreditable model stacks; no Chinese-origin model dependency.

Your procedures

On-node knowledge base holds your kit, transports, services stack, TTPs, and SOPs. An assigned developer FSR encodes warrant-approved TTPs into the kit.

Human in charge

Chief coaches and documents. Operators execute. Warrants retain authority. Soldiers still verify the fix.

LEGAL ENTITY

TK Tech Venture LLC (Texas)

ASK CHIEF LINEAGE

iOS app · 3,000+ soldier adopters since 2023

DELIVERY

COTS kits · pull-the-cable boxes, not SaaS

PRIMARY NAICS

541512 Computer Systems Design
